DESCRIPTION OF PROGRAM

The CEC is an outdoor residential environmental education organization. Our programs are held at Living River, around 45 miles southwest of Birmingham. Cahaba Environmental Center's school programs involve activities of a physical nature that take place in a wilderness environment. Participation may involve the following, but is not limited to these activities: classroom instruction and hands-on learning activities, hiking with a backpack on trails and in the vicinity of bodies of water, canoeing (only if requested by the teacher in advance).
